Z-Dimensions

The Z-Dimension is the distance from the bottom of the cuvette compartment in the instrument to the center of the light beam.

Each instrument manufacturer optimizes the height, width, focus and placement of the light beam within the design of an instrument to ensure that it performs optimally.

It is important to users when attempting to use a small sample volume, as the sample will need to be placed in line with the light path.

The table below shows typical Z values for several of the most popular brands of Spectrophotometer:

Manufacturer	Z Height
Agilent	15 mm
Beckman	8.5 mm
Bio-Rad	8.5 mm
Eppendorf	8.5 mm
GBC	15 mm
Hewlett Packard	15 mm
Hitachi	8.5 mm
Jenway	15mm
Perkin-Elmer	15 mm
Pharmacia	15 mm
Shimadzu	15 mm
Spectronics	8.5 mm
Turner	8.5 mm
Varian	20 mm
